

PAIS REQUIREMENTS

1. Required Files/Documents

- List of all files/documents needed for PAIS.
- Sample files/templates for:
 - Assignment
 - Promotion
 - Alpha List for personnel importing
 - Leave Order
 - Administrative Order
 - Other types of Orders
 - Other personnel-related documents
- Identify which documents should be uploaded and which should be generated by the system.

2. Module Flow/Process

- Provide the flow/process of each PAIS module.
- Identify the steps that personnel or authorized users need to follow.
- Identify who is responsible for each step, such as encoding, checking, and approval.
- Example: **Leave Process**
 - Filing of Leave
 - Checking/Verification
 - Approval
 - Generation of Leave Order
 - Recording of approved leave

3. Education and Training

- Provide the existing list/reference for Education and Training.
- List the required information/fields for Education records.
- List the required information/fields for Training records.
- Provide any existing categories, classifications, or standardized lists that should be used.

4. Promotion

- Provide the complete flow/process of the promotion module.
- Provide the documents/forms used for promotion.
- Provide the required information for the promotion tally.
- Explain how the tally/score is calculated.
- Identify which values should be **automatically calculated or updated** after entering the tally.
- Example: Once the tally is entered, the system should automatically update the corresponding **total, count, ranking, or other related forms/documents**.
- Provide the existing computation/formula or sample tally for reference.

5. System Automation

- Identify manual processes that should be automated in PAIS.
- Identify information that should automatically reflect across different modules.
- Identify documents or reports that should be automatically generated from the stored personnel information.
